Sponsored by:

“Missing Link” Seminar Topics

1. “Restorative Materials, what, when, where, & how

CROWN AND BRIDGE

2. “Choosing an implant Abutment & Crown

3. “Making Cements work for You

IMPLANT DENTISTRY

This seminar will provide a comprehensive overview;

1. Of the many traditional and new restorative materials that have come on the market, their uses both pros and cons,
2. The many new and exciting implant abutments and crowns available, also how and when to choose them.
3. A look at the various cements available, and the best available application for success.

At the completion of this course, participants will be able to:

- Understand the pros and cons of new restorative materials, what the requirements are for each, and be able to choose the restoration that best suits the application needed for the patient’s health and esthetics.
- Understand the importance of implants for the General Dentists in offering unique solutions to difficult cases
- Familiarize yourself with the various styles of abutments, and the restorative crown materials available to make your implants a success.
- Understanding why cements fail, and the methods of prevention. Also familiarize your staff with the many new cements available, the applications, and the protocols that make these and traditional cements work.
